FIRE PROTECTION

Provide critical advantages for system owners, designers and contractor. The complete **TIGERFLOW** system is factory built, tested and ETL/C-ETL third party certified before shipment. That means the unit arrives on site meeting and/or exceeding all relevant industry standards, including NEC and NFPA guidelines. Liability and performance risks are eliminated. System designers appreciate the time savings and **TIGERFLOW** expertise built on each project. Coordinated deliveries of third party certified systems make contractor performance penalties and delays inherent in site-built/site-certified systems a thing of the past.

Prefabricated Units with Environmental Enclosures

BENEFITS

- 3rd Party ETL/C-ETL Labeled Systems ASME Section 9 Certified Welding
- UL Listed/FM Approved Components
- NFPA 20 & NEC 70 Compliance
- Factory Tested
- Single Source Responsibility
- Start-up & Field Training
- NFPA Pamphlet 20 Full Compliance

STANDARD FEATURES

- NFPA 20, NFPA 850, UL, FM, NEC compliance
- Factory Tested
- Start-up and Field Training
- Prefabricated Skid Mounted Units (Pump, driver, controller and piping all mounted on a steel skid)
- All required accessories per NFPA 20
- PLC and HMI based controls technology
- Third party labeled ETL
- All controls labeled UL 508 "Industrial Control Panels"

OPTIONS

- Drivers: Electric Motors, Diesel Engine, Steam Turbine
- Pumps: End Suction, In-line, Horizontal Split Case, Vertical Turbine
- Prefabricated Units with Environmental Enclosures

APPLICATIONS

- Commercial
- Institutional
- Municipal
- Industrial applications
