

POWER GENERATION/INDUSTRIAL

# INDUSTRIAL PUMPING SYSTEMS

**TIGERFLOW®**

Systems design for water distribution and fuel transfer for power generation and other industrial applications

To place an order, please contact 214-337-8780 or [sales@tigerflow.com](mailto:sales@tigerflow.com)

## BENEFITS

- Single source responsibility
- UL/C-UL listed packaged pumping systems (QCZJ)
- UL 508A certified - standard for industrial control panels
- ASME section IX certified pipe welders
- AWS D1.1 certified structural welders
- Touchscreen interface controller
- Ability to provide customize software & control strategies
- Prefabricated and factory tested
- NSF-61 and/or ASME code bladder tanks
- Custom design to meet engineering specifications
- NIST traceable testing facility
- Weld testing upon request
- Dedicated project manager

## STANDARD FEATURES

- All piping designed in accordance with ASME B.31 piping codes
- All electrical installed in accordance with NEC and OSHA
- All systems designed and built per Engineering specifications

## OPTIONS

- Shot blast skid & piping to SSPC-SP10 standard
- Custom paint & colors per engineering specifications
- Galvanized skids
- Strainers
- Magnetic flowmeter

- Environmental enclosures with state certification
- A/C units
- Custom building facia
- Sampling taps

## APPLICATIONS

- Industrial
- Demineralized Water
- Ammonia Water
- Fuel Unloading

- Cooling Water
- Fuel Forwarding
- Tepid Water Eyewash & Shower Stations

## CERTIFICATIONS
